

# ISIAME 2022

OLOMOUC, CZECH REPUBLIC

## International Symposium on the Industrial Applications of the Mössbauer Effect

Palacký University Olomouc, September 11–16, 2022

### Tentative symposium topics:

- T1 Catalysis
- T2 Energy (coal, oil, nuclear, solar)
- T3 Environment
- T4 Magnetic Materials and Superconductive Materials
- T5 Biology & Biomedicine
- T6 Mineralogy
- T7 Corrosion
- T8 Electrochemistry, Batteries, Sensors
- T9 Applications Using Synchrotron Radiation
- T10 Nanotechnology
- T11 Metals & Alloys
- T12 Methodology & Instrumentation
- T13 Surface Modification
- T14 New Glass and Amorphous Materials
- T15 Rare Earth Materials
- T16 Metallurgy

A broad range of topics are supposed to be covered during the symposium, mainly with the focus on those that have the potential to attract researches towards the industrial applications of Mössbauer spectroscopy and stimulate contact between the industrial and academic worlds. The official language is English.

Come and share your experience  
with the community!
